

TRAINER PRE SPORT CREAM

COSMETIC ADJUVANT IN THE PREPARATORY TREATMENT TO SPORTS

BEFORE

RECOMMENDED FOR

- ALL SPORTS
- Athletes who find it hard to warm up
- who wants immediate muscle response
- who trains in cold conditions
- races with explosive starts

INFORMATIONS

The start of the exercise session is a strategic moment in sports practice. A proper warm-up of the muscles is essential to perform effectively. The warming massage can facilitate the preparation of the muscle for sports and helps the achievement of the goal of work.

PRODUCT FEATURES

Trainer is a fluid and light cream-gel that helps the preparation of muscles and ligaments for exercise. The sensation of heat is perceived quickly and deeply, generating a moderate, progressive and effective heating in all the massaged parts, improving performance and physical condition. A good warming massage, performed with the Trainer cream, effectively prepares the body and promotes its activation, counteracts the appearance of cramps and muscle pain and oxidative stress from intense and prolonged exercise. Trainer absorbs quickly, does not grease, does not stain and is suitable for use in all seasons.

INDICATIONS

The product is suitable for the preparation for physical activity generating a progressive and deep sensation. The cream-gel, thanks to the presence of camphor and other active ingredients, generates a benefit also in the symptomatic treatment of pain caused by exercise.

HOW TO USE

Before the sport (about 10-15 minutes) apply an adequate amount of product on the part involved in the exercise, massaging until complete absorption. Wash hands thoroughly after use.
